# Sage AI Transition to UAIP

How Sage AI evolves from business-segment solution to cornerstone of UHG's enterprise AI platform

Transition Evolution

Current Sage AI
Foundational Capabilities

Proven AI agents delivering measurable value in production

- Summarization Agent (Curo Recap)
- Documentation Agent (Auto Call Documentation)
- 55 pilot users, 1M+ summaries delivered
- Established governance processes

Enhanced Sage AI
Platform Integration

Sage AI capabilities integrated into UAIP architecture

- Migration to UAIP infrastructure
- Enhanced governance automation
- Multi-cloud LLM gateway integration
- Internal marketplace participation

UAIP Foundation
Enterprise AI Platform

Sage AI as cornerstone of UHG's unified AI ecosystem

- Enterprise-wide AI agent deployment
- Automated governance and compliance
- Cross-business unit reusability
- Strategic AI innovation hub

Implementation Approach

1 **Phase 1: AI Studio Builder** — Q3 2025
- Standardize development and deployment pipelines for AI artifacts
- Build Agent Playground & bootstrap Environment Provisioning
- Implement deployer workflows for Agent & their Artifacts

2 **Phase 2: Platform Integration** — Q3 2025
- Integrate UAIS and Sage via SSO
- Integrate LLM Gateway & AI Marketplace
- Implement Observability Stack

3 **Phase 3: Enterprise Expansion** — Q4 2025 - 2026
- Scale proven patterns across UHG business units
- Deploy advanced governance and monitoring capabilities
- Establish Sage AI as UAIP for Enterprise adoption

Strategic Vision: Sage AI as UAIP Foundation

Sage AI's proven success in production provides the blueprint for UAIP's enterprise-wide deployment. By transitioning Sage AI to serve as the foundational reference implementation, UHG establishes a **battle-tested, governance-compliant AI platform** that can be confidently scaled across all business units while maintaining the highest standards of responsible AI deployment.
